

## AMALFI IN-WATER CHAISE | Water Filling Instructions

### **Step 1**

Begin by turning the Amalfi on its side or over completely to locate the two yellow plugs on the underside. Using either a flat head or Phillips head screwdriver, unscrew the plugs.

### **Step 2**

With the chaise turned over and the open holes facing up, bring the chaise to the pool and slowly submerge in water. The water will begin to fill the open cavity with the properly chlorinated pool water. Allow several minutes for this filling process.

*IMPORTANT: Do not fill using the garden hose – only properly chlorinated pool water!*

### **Step 3**

Once it appears the cavity has been filled with water, place the plugs back into the holes and use the same screwdriver to reinstall them.

### **Step 4**

Carefully (and perhaps with a partner) turn the chaise over and guide to your desired location on the sun shelf. Use caution so as not to scratch either the chaise or the pool surface.

### **Step 5**

Sit back, relax, and enjoy your hard work – you deserve it!
