Description

Provide guests the option to relax by the pool or in it with our new Aqua in-water Sunbed! This sleek, modern chaise is hollow so it can be filled ensuring it won't float away on the Baja shelf. Ideal for pools, boat decks, and waterside getaways, this chaise offers the best in quality and style. It features a wider base for enhanced comfort with notched edges for securing cushions if desired.

Designed with comfort in mind, the tilted backrest offers the optimal angle for sunbathing and ease for getting up. Made from commercial polypropylene resin that will not chip, peel, or rust and is resistant to fading. Additionally, this resin construction is resistant to salt and makes a great option for lounging along the coastline without the worry of the salty sea air damaging the surface.

About Nardi

Pool Furniture Supply is a proud distributor of Nardi Italian products. Nardi has been designing and producing award-winning commercial quality outdoor furniture for over 30 years. Becoming increasingly recognized for their unique design, top-notch quality, and sustainable practices. Their polypropylene resin is color separated, never contaminated by other materials, and production waste is reprocessed for 100% recyclability. Everything is crafted in Italy while being respectful of the environment; from their solar-powered factories and recyclable materials to the 75% recycled fiber packaging.
