INSTRUCTIONS:

- Read through all instructions before beginning assembly.
- Inspect all the pieces to ensure you have everything you need.
- Manual assembly recommended. However, a power drill will be required for Step 6. Be sure to reduce the torque setting and be careful not to over-tighten.
- Assemble side table on a clean, smooth surface to avoid scratching the product.
- Save all packaging until finished.

A Leg A (2)
#MC2012GY

B Leg B (2)
#MC2013GY

C Support Panel w/ Logo (1)
#MC2009GY

D Support Panel (1)
#MC20010GY

E Shelf (2)
#MC2011GY

F Adjustable Feet (4)
M6x14mm
#MC1201

G Wood Screw (16)
M5x45mm
#MC1109

H Truss Screw (8)
M6x50mm
#MC1114

I Tabletop (1)
#MP8704

Tools Needed:

Phillip Screwdriver
Bit #2
(for wood screws)

Phillip Screwdriver
Bit #3
(for truss screws)

Power Drill

- 1** Attach Legs (part A and B) to the Support Panel (part C) using 4 - M5x45mm wood screws (part G). Make sure the logo faces outward and pre-drilled holes face upward as shown. Top surface of cross support should be aligned parallel with the top and bottom surface of the legs.

- 2** Repeat for the other side using the Support Panel without the logo (part D).

- 3** With 2 - M5x45mm wood screws (part G), attach one shelf (part E) to the first leg assembly. Align the pre-drilled holes as shown ensuring the counter sunk feature is facing upward. Underside of the shelf is labelled "bottom".

- 4** Repeat Step 3 to attach the shelf to the second leg assembly.

- 6** Attach the table top (part I) to the leg assembly with M6x50mm truss screws (part H). Install two truss screws per leg. There are no pre-drilled holes in the table; however, the screws will self-tap into the plastic.

- 5** Add the second shelf (part E) and secure it with 4 - M5x45mm wood screws (part G).

- 7** Install the adjustable feet (part F) in the bottom of each leg.

MIS144 - MESASIDETABLE#8703

The **MESASideTable** is designed for year-round use and built to last. Extend the life of the table and keep it looking new by treating the wood components yearly with a water-based wood stain or sealant designed for exterior use.

GENERAL INFORMATION ABOUT THE MATERIALS:

WOOD: The wood components provided with your MESA product are made from 100% FSC Certified Cedar and come with a protective water-based stain. The Cedar is resilient and intended for year-round use in all climates.

Please Note: With any natural wood product, it is common to see knots, small checks (cracks), minor warping, and fading as part of the weathering process. These minor imperfections occur naturally and have no impact on the strength or integrity of the product.

POLYETHYLENE: The resin components provided with your MESA product are molded from high-quality polyethylene (LLDPE). This material is extremely durable and is also intended for year-round use in all climates.

PRODUCT MAINTENANCE:

WOOD: The cedar components are pre-stained at the factory but exposure to sunlight will break down the water repellent, reducing the effectiveness. To extend the life of your product, we recommend staining the wood components on an annual basis. If products will be exposed to harsh weather for prolonged periods of time, we recommend covering when not in use for added protection.

POLYETHYLENE: Clean using a non-abrasive cleaner and cloth, then simply rinse with a garden hose. For deeper cleaning you can use a power washer; however, be careful to only spray the polyethylene surfaces and do not pressure wash the wood as this will deteriorate the protective stain.

HARDWARE: Inspect screws and bolts annually for signs of rust. If rust is present, sand and repaint or replace if necessary.

SAFE USER RECOMMENDATIONS:

- Inspect wood for splinters and sand smooth before use.
- Ensure all hardware is firmly tightened before using product, being careful not to overtighten since this could cause crushing and splintering of the wood.
- Wood is not flame retardant and will burn. Do not place furniture too close to fire pits or open flames. Caution should be used if placed in proximity to fire pits or open flames.
- Use product on a level surface. Adjustable feet are included to assist with minor leveling adjustments.

LIMITED WARRANTY:

• Mayne products are covered by a warranty that safeguards against defects in materials, manufacturing, and workmanship. This warranty is exclusive to the original owner and is non-transferable. To validate any warranty claims, proof of purchase and regular maintenance are essential.

Hardware – 1 Year

Wood Components – 5 Years

Resin Components – 15 Years

This Limited Warranty does not cover:

- Labor for replacement of any defective item(s)
- Incidental or consequential damages
- Cosmetic defects which do not affect performance or integrity
- Vandalism; improper use or installation, or acts of nature including but not limited to windstorms, hail, floods, excessive water exposure or damage by animals/wildlife

Warranty claims may be submitted by providing photos of the defect along with proof of purchase to customerservice@gomayne.com.
