

Trash Cans

- We have a 100kW solar array at our extrusion plant that supplies 20% of the plant's electrical demand
- Reduced our waste to landfill stream by roughly 70%
- Recycled polystyrene (think foam coffee cups) is the main ingredient in Highwood extrusion (recycled polyethylene (recycled milk jugs) for RPI lumber)
- We send 100% of scrap cutoffs and sawdust from our fabrication plant back to our extrusion plant to be reground and blended back into our extrusion
- Material will not degrade/need to be replaced
- No painting or staining needed

All Trash Cans include a 30 gallon insert and comes assembled

MODEL # SH-TR01NA

No Hood – 22.75 x 22.75 x 33.5 – 58.8 lbs.

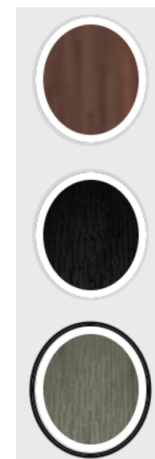

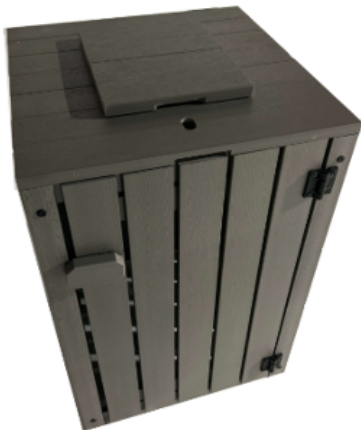

MODEL # SH-TR01HA

Hood – 23.5 x 24.1 x 42.21 – 75.6 lbs.

MODEL # SH-TR02NA

No Hood - 22.75"L x 22.75"D x 33.5"H - 58.8lbs
