## Ledge Lounger Polyethylene Repair Instructions

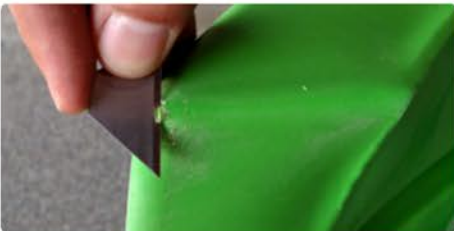

Here are tips on making minor scrape and gouge repairs to Ledge Lounger polyethylene products.

### Materials Needed

- Cleaning Supplies
- Razor Blade
- Propane Torch
- Small Piece of Plastic

1) Be sure to clean the area of the repair as best as possible, removing all dirt. \*TIP – wear gloves or make sure hands are clean before beginning repairs.

2) Use RAZOR BLADE to remove residual plastic from scrape or gouge to try and eliminate any excess.

3) Use PROPANE TORCH to heat the plastic, melting any excess, be careful not to heat the plastic to much that it melts or burns, just enough to make it pliable.

4) Immediately take the small piece of plastic to press the heated resin forming it flat.

Results may vary on severity of damage.
